Nimród Lobožár

Software developer (Student/Intern)

Motivated software developer intern with hands-on experience in frontend development, showcasing a strong aptitude for creating responsive web designs using HTML, CSS, and JavaScript. A proactive collaborator with a commitment to enhancing user experience and engagement, complemented by leadership experience in structured youth programmes. Eager to leverage a creative mindset and dedication to personal growth in a dynamic software development environment.

Work experience

Frontend developer (Intern)

September 2025 – June 2026

Code-Cube.io, Utrecht

- Redesigned the full client portal in React JS, built from Figma designs.
- Developed frontend notification logic for a deviation-based resend feature.
- Configured client-specific scenarios for the DataLayer Guard product.
- Implemented the DataLayer Guard tool of Code Cube on client websites.
- Collaborated with designers and developers using Git and Scrum workflows.

Voluntary

August 2020 – Current

Hungarian Scouting (70. Attila), Zeist, Den Haag

- Several years of experience leading and mentoring children, with a strong focus on life skills development through structured programs.
- Active involvement in scout camps as both a leader and an organizer.
- Annual organizer of weekend scout camps in the Netherlands for Hungarian scout troops from Western Europe.
- Completed Patrol Leaders' Training Camp twice: as a participant (2021) and later as an instructor (2025).
- Successfully completed the Assistant Scoutmaster Training Camp as a participant in 2024.

Education

Software Development

August 2023 – Current

MBO Utrecht ICT Academie, Utrecht

During the programme, relevant topics covered included web development, object-oriented programming, databases and SQL, and Scrum methodology. Practical work included building multiple full-stack web applications such as a sneaker event platform with order management and invoicing (PHP, MySQL), a driving school booking system and a food bank management app (both built with Laravel and Blade), and a static frontend shop (HTML, SCSS, JavaScript). Also participated in a collaborative group project developing an ADHD support application.

HBO ICT – Software Engineering

Starting September 2026

Hogeschool Utrecht – dual-track (BBL) programme
